SUMMARY

Frontend Angular Developer with 9+ years of experience building scalable, enterprise-grade SPAs across domains. Specialized in Angular 2 – 18+, Standalone Components, RxJS, NgRx, Signals, and modern frontend architecture. Proven success in leading UI teams, driving Angular upgrades, optimizing performance, and aligning frontend delivery with business outcomes.

SKILLS

Technical Skills	Angular, Nx Monorepo, React, NodeJs, Jest, JavaScript, TypeScript, CSS3, HTML5, Bootstrap, AG Grid, Okta, Entra ID, Git, BitBucket, JIRA, RxJS, NgRx, JSON, REST APIs.
Soft Skills	Communication, Problem-solving, Adaptability, Creativity, Teamwork.

EXPERIENCE

Sr. Application Developer

Nov 2025 - Present

Arise TechGlobal

- Built scalable Angular applications using Nx monorepo architecture for modular and maintainable code.
- Implemented state management using NgRx (Store, Effects, Actions) to manage complex UI and API interactions.
- Integrated REST APIs for product management, vendor data, AI suggestions, and audit history.
- Developed high-performance data grids using AG Grid for handling large product datasets.
- Implemented role-based access control using Okta authentication and custom route guards.
- Optimized API calls and UI performance using RxJS operators and efficient state handling.
- Designed reusable components and shared libraries to improve development speed and maintain consistency across modules.

Application Developer

May 2024 - Nov 2025

Sira Consulting Inc.

- Key contributor in developing Assets Insights, a market-leading IT Asset Management (ITAM) platform.
- Designed a single source of truth for IT assets with real-time insights, detailed reporting, and lifecycle tracking.
- Integrated a dynamic Vulnerability module, linking hardware/software CVEs to affected assets.
- Implemented UI enhancements including dynamic icons, clickable CVE links, collapsible sections.
- Built advanced table features: search validation, pagination, filtering, and sort functionality for large data sets.
- Coordinated tasks, conducted code reviews, and ensured timely feature delivery.

Senior Software Engineer

Nov 2020 – May 2024

Cignex Technologies Pvt. Ltd.

- Implemented a comprehensive code review process reducing post-release bugs by 30%.
- Pioneered the adoption of Angular CLI, improving project structure and build times.
- Led the implementation of a RESTful service improving overall efficiency by 20%.
- Mentored 6 UI developers, resolved blockers, and enforced best practices.

- Spearheaded redesign of a core module, increasing user engagement by 25%.
- Received recognition for outstanding teamwork and on-time delivery under pressure.
- Implemented responsive design, improving mobile satisfaction by 40%.

EDUCATION

BCom (Computers) ,Monad University

2012 - 2015

PROJECTS

MDM Product Enrichment Platform: An enterprise-grade Product Enrichment Platform to manage and enhance product master data for large-scale catalogs, enabling efficient product data management, vendor collaboration, AI-based suggestions, and audit tracking.

- Built scalable Angular applications using Nx monorepo architecture for modular and maintainable code.
- Implemented state management using NgRx (Store, Effects, Actions) to manage complex UI and API interactions.
- Integrated REST APIs for product management, vendor data, AI suggestions, and audit history.
- Developed high-performance data grids using AG Grid for handling large product datasets.
- Implemented role-based access control using Okta authentication and custom route guards.
- Designed reusable components and shared libraries to improve development speed and maintain consistency across modules.
- Implemented dashboard, product listing, vendor management, AI suggestion workflows, and audit history modules.
- Stack: Angular, Nx, NgRx, RxJS, AG Grid, Okta, TypeScript, REST APIs.

Assets Insights Platform: A scalable IT Asset Management (ITAM) solution offering centralized visibility, control, and risk management for enterprise assets.

- Designed and developed a centralized ITAM platform providing a single source of truth with real-time asset visibility, compliance tracking, and lifecycle management.
- Integrated a dynamic Vulnerability Management Module using NIST CVE APIs to identify and track exposure across software and hardware assets.
- Built reusable Angular components with dynamic data binding, enabling collapsible views, clickable CVE references, and responsive summary bars.
- Implemented advanced table features including multi-field filtering, client-side pagination, and conditional sorting for large datasets. navigation with query parameter-based routing, improving state persistence across modules and filters.
- Designed context-sensitive banner messages to display security alerts, informational messages, and platform updates based on user profile and settings.
- Stack: Angular 18, TypeScript, RxJS, Bootstrap, SCSS, REST APIs, GitHub.

CEDAR: CEDAR (Calc Engine Development And Regression) is a tool poised to replace Calc Builder in upcoming releases. It supports automated testing and covers a broad range of provisions.

- Evaluated existing application UI's and recommended usability improvements.
- Involved in enhancing the application while ensuring seamless delivery.
- Worked on upgrading the CEDAR Angular project from version 8 to 13, and later from 13 to 15.

VAssist: VAssist is an agile, MEAN stack-powered online portal for hassle-free visa assistance. Users can independently fill embassy forms, upload documents, and receive guidance up to the embassy interview.

- Worked on creating modules, components, directives, and services.
- Integrated front-end design with HTML5, CSS3, and Angular4.
- Developed form validation and responsive UI components for a smooth user experience.
